PAMS- PERSONAL ACCOUNT MANAGEMENT SYSTEM

The screenshot shows the PAMS Home Page. At the top left is the PAMS logo, a stylized 'P' made of horizontal lines. To its right is the text 'PAMS' and the tagline 'Manage Finance With Economize'. Below the tagline is a 'Select Language' dropdown menu. At the top right, there are input fields for 'Username:' and 'Password:' with a 'Go!' button. Below the header, a welcome message reads 'Welcome to the Personal Account Management System'. The main content area features a large image of a hand typing on a calculator. To the right of the image is a section titled 'Account Xpress With PAMS' containing a detailed description of the software's features. Below this is a section titled 'Why PAMS?' with a small image of a calculator and a list of three bullet points. At the bottom, there is a navigation menu with links for Home, Gallery, Reservation, Cancellations, Contests, and About Us, followed by the text 'Powered By Tecrizon Solutions'.

Welcome to the *Personal Account Management System*

Account Xpress With PAMS

PAMS is a personal finance management software loaded with features designed to help you manage your money accurately and efficiently. Track and reconcile transactions for virtually any kind of account (credit cards, savings, checking, credit line, cash, etc.) Budget management is made easy with the help of user-defined income and expense budget categories, budget projections, and budget versus actual comparison reports. A tree view structure similar to what you are used to see in Windows Explorer gives you access to the information you need quickly and easily. Features include presentation of a global cash flow picture, calculation of net income over any given period of time, two distinct methods for managing your budget, transaction splitting into many accounts and/or budget categories, transaction schedules, transaction templates, support for multi-currencies, unlimited number of budget category levels, numerous charts and reports related to your financial and budget activities.

Why PAMS?
