About Us

Brindley Technologies touches each and every aspects of lives with innovative solutions and products to cater to the needs of customer in a cost effective way without compromise on quality of solutions delivered. Greater efficiency comes with the promise of delivering quality solutions on time every time with highly satisfied global customers by putting customers at the center point. For us to stay ahead in competition, our CUSTOMER satisfaction always comes first. No matter what it takes, we help our customers solve their IT needs.

Given the volatile operational environment that corporates face today – there is a constant pressure to keep up with any changes in regulations, mergers and acquisitions, evolving business models and maintaining an efficient cost management system. While most corporates recognize the need of replacing their legacy systems with a more integrated infrastructure, there lies an underlying uncertainty about possible risks that could impact their business due to any re-structuring of processes or internal transitions.

Our Vision

To be a technological pioneer and a reliable partner to our clients by offering cost effective and high performance solutions through our global delivery center, across the globe.
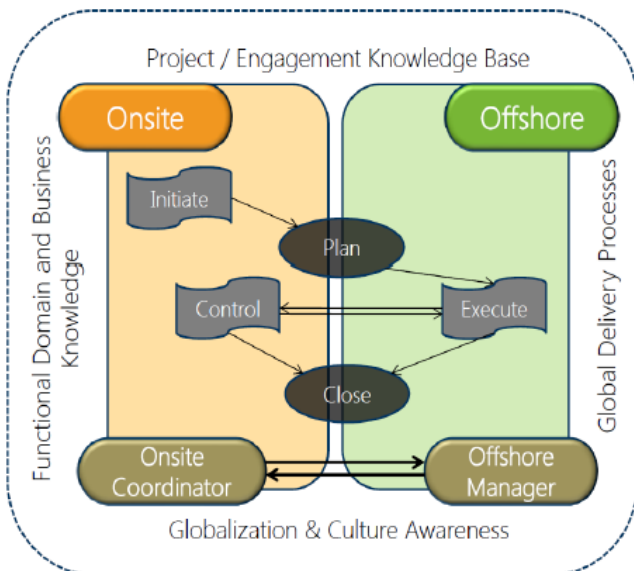

Our Mission

To achieve our objective in an environment that fosters honesty, fairness and integrity and a single mined focus on the success of our customers.

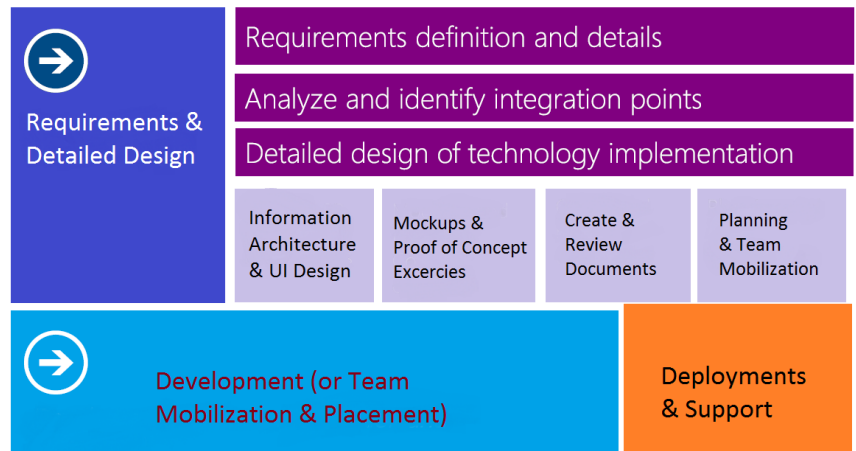

Our Approach

Global Teams

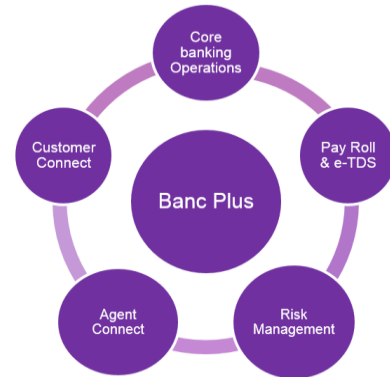

Solution Delivery

Operational methodologies

- Structured and Standardized processes at each work unit
- Continuous improvement and Evolution
- Governed by our core values and Strategies

Core Banking

Our customer banks and financial services organizations have benefited by adopting or customized banking solutions, by way of one or more key performance areas including modernization, rapid business expansion, implementing multi-channel services, enhanced productivity, improved compliance & governance and above all quantum leap in profitability.

Besides this, we have BancPlus®, an already existing banking application that serves cooperative banks and other micro-finance institutions. BancPlus® is one of the handful solutions in the global markets that helps to automate majority of banking processes on a common technology backbone
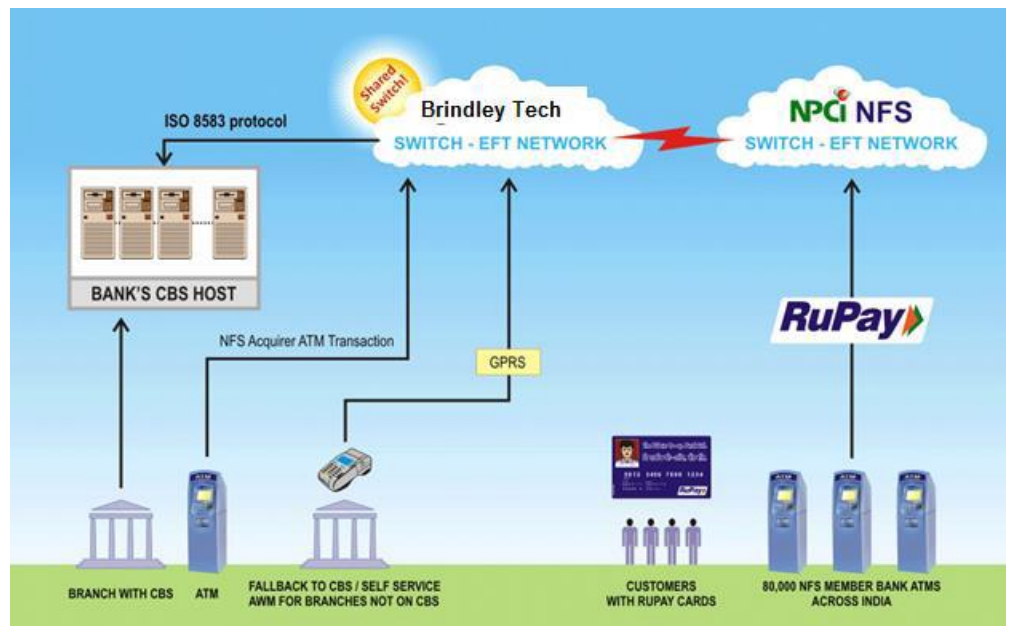

Payment Solutions

Brindley Technologies with its nearly two decades of experience in providing comprehensive, multi-channel delivery to its customers, is now offering entire gamut of the above Payment Solutions to our customer banks.

We provide:

- IMPS Services of NPCI)
- E-Channel Integrator

WE PROTECT YOUR ATMs AGAINST

| Drilling | Removal | Gas Cutting | Hammering |

Insurance solutions and Products:

Brindley Technologies offers solutions that can assist Insurance firms to protect investments in their existing IT solution infrastructure whilst interfacing new solutions around Data Management & Multi-channel integration to provide a richer customer experience and effectively manage the risks of doing their business. We provide solutions in the areas of: Brindley Technologies has a capability and expertise in execution of the Turnkey programs executing Integrated Insurance Management Systems – Implementation, helpdesk, support & maintenance.

Mobile Banking

Nowadays, companies that are devoted to commercialization of products and services show economic backwardness, technological stagnation and reduction of clients, sales and offer of innovative products and services because they do not implement technology solutions for mobile devices appropriate to the trends and needs of consumers, this means, they do not migrate their traditional payment systems to mobile systems that provide easy-to-access, secure and reliable for the client.

Enterprise Mobility

Brindley Technologies provides Consulting, Implementation and Configuration, Managed Services and end-to-end lifecycle management for Enterprise Mobility Program. We cover the entire scope of app and device lifecycle and work as your trusted partner.
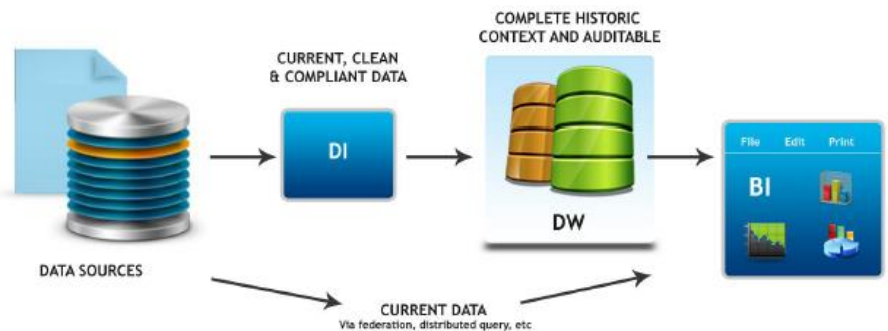

Following are our specializations:

- App, Platform and Services Consulting
- App Development, Legacy systems migration & porting and Testing
- Managed Services and Lifecycle Management

Business Intelligence, Predictive Analytics and Big Data Analytics

The data opportunities for gaining valuable new insights by blending and analyzing the multiple datasets is enormous; at the same time, the challenges of data are to store, protect and handle data appropriately, to prevent it from becoming a liability. With data opportunities come data challenges. Brindley Technologies helps organizations with the end-to-end business intelligence solutions, predictive analytics solutions and big data solutions.

Cloud Computing

Where in the past, people would run applications or programs from software downloaded on a physical computer or server in their building, cloud computing allows people access to the same kinds of applications through the internet. Brindley Technologies provides cloud services and helps the clients by providing the following features:

- Flexibility
- Disaster recovery
- Security
- Competitiveness
- Increased collaboration
- Work from anywhere
- Document control

Internet of Things

The "Internet of Things" is not a second Internet – rather it's a network of devices that are connected to the Internet that is used every day to search Google, upload images and connect with friends. It's a network of products that are connected to the Internet, thus they have their own IP address and can connect to each other to automate simple tasks. Internet of things is really the next frontier in this electronic era and Brindley Technologies are taking it very seriously. We support the following as part of Internet of things:
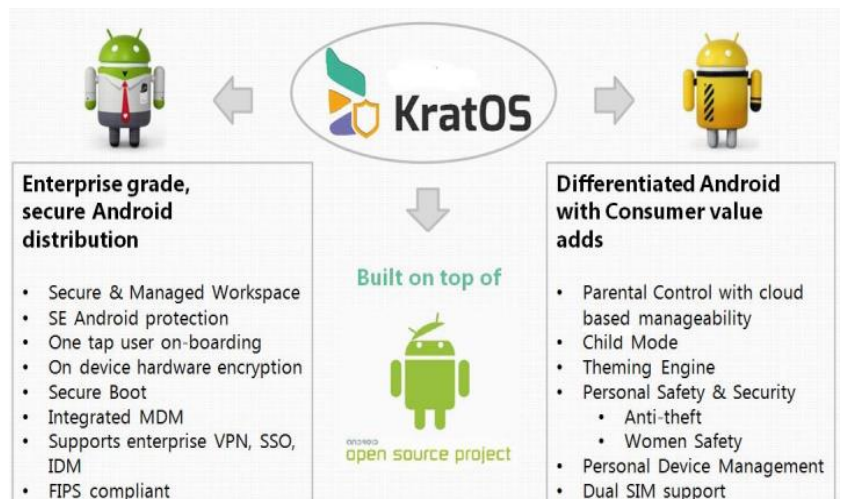

- Apple watch app development
- Set-top box controlling systems
- Digital Application development
- Google glass app development
- Wearable computing app development
- Headless device app development
- Gadget app development
- Industrial app development
- In-car app development
- Apps for mobile security
- Portfolio management apps
- Commodity market apps
- Mutual funds apps
- Telecom solutions
- Oil and Gas solutions

KartOS

KartOS is a Secure & Differentiated Android for Enterprise & Consumer devices. KartOS is available for enabling both enterprise and customer focused devices. Security is the prime concern that has been taken care of with KartOS. Salient features of KartOS are:

- Managed security with enhanced device management, this means that users have an option to manage security to the customer and to apply security to partial zones
- Enterprise persona, i.e. a separate partition coexists within the android framework
- Secure boot chipset, to have only predefined signed kernels to boot on enterprise device

Sunrise Retail

A cloud based retail ERP solution. The fundamentals of the application are:
Encompasses SaaS and is a pure cloud solution
Security, protection of corporate data and applications, backup data storage
Connectivity, works seamless with eConnector framework

Banco Movil

It's a mobile banking and payment solution already rolled out in Mexico. It takes care of transaction management, balance enquiry, payment of bills, account management and many other activities.

Winsure+

Our insurance solution uses cutting edge technology which helps our customers to:
- Increase efficiency
- Improve quality
- Improve transparency
- Increase agility

The use case of the application include:
- Policy Administration
- Claims Management
- Case Management (E-BPM)

Pollution control Solution
