A Finite Solution

About Us

Glance at WebClues

Your vision, our creation

WebClues started in 2014 with web development and designing services with team of five experts, we then explored and mastered iPhone app development, Android app development, Windows-phone development and mobile games. From simple PHP programming to customized apps development, we have successfully delivered all size projects for almost all industry verticals and reached the team of 80+ resources on board.

WebClues primarily aims to provide clients complete IT solutions and outsourcing services which include website design, web application development, CMS-based dynamic website (complete control over website content and front-end), eCommerce solutions, mobile application solutions, latest technologies (Node, iBeacon, AWS, IOT etc.) at affordable price with superior quality. We have well-equipped development center in India housing a team of 80+ of experts in different domains including research, business analysis, project management, programming, database administration, creative designing, animation and quality control.

Execution Strategy

Adaptive planning, evolutionary development, early delivery, and continuous improvement

These determine KPIs reports and other metrics, per user, in order to monitor that the process is working as agreed.

Mapping processes to determine the starting point and the 'Actual State'.

Evaluation and monitoring.

Evaluation of processes and current structure of the company.

Agile
Methodology

Application, construction and implementation.

Suggestions for improvement and process optimization.

Weekly delivery of developments for the end user to operate and request for changes. It is **ideal** that the end user is part of the process of development and testing.

Optimize a process with a right combination of technologies.

Application design together with the client.

We choose technologies and review options with the client. The client is part of the project from the very beginning and feedback is **vital.**
