

Custom Software And App Development

Delivering Quality IT Solutions Around The World

Since 2002, Techliance has been delivering quality IT solutions for businesses of all sizes around the globe. Techliance is headquartered in Salt lake city, Utah with multiple development offices overseas. Our United States team gives our clients contact with someone local to your business. Our many dedicated employees in these overseas regions help to reduce development costs while meeting your budget and timeline.

Techliance has delivered solutions to many different industries including automotive & locomotive industry, distribution & supply chain, transportation industry, e-commerce solutions, humanitarian agencies, software services industry, public services institutions, financial services institutions, healthcare and related industries, sports, and related industries.

Advantages Of Techliance

....

Reduce costs by using international employees and resources.

A US-based presence so you have clear communication with our company

<u>∕°</u> 8~8

We allow our IT resources to be an extension of your team.

Complete projects more quickly by adding additional resources that your budget would not have previously allowed.

Quality, experience, and well-educated resources.

Ś

Developing better relationships with the world.

Our Services

We Do A Lot At Techliance. Here's How We Can Help.

Software Development

OS-specific (Windows, Mac, Linux) or cross-platform custom applications for offline work with total control over data security, increased efficiency and performance.

Big Data Applications

Custom tools built specifically to provide the deepest insights on meaningful components of your business based on the results of high-volume data processing.

Mobile App Development

Native (for iOS, Android, Windows) or cross-platform (on Cordova, Xamarin, React native) custom mobile applications to compliment your web application or created as a separate solution with their own back end (.net, java, php, node.js).

Real-time Applications

Custom applications that exploit the latest technologies to process real-time data and provide response upon the processed results within a strictly defined interval.

Web Portals

Custom applications that perfectly work across all popular browsers and deliver immaculate UX with a clear logical layout and mobile adaptation.

Cloud Solutions

Experience in many platforms and applications in the cloud, and our clients have partnered with us to develop solutions using some of the industry leading applications and technologies in the cloud.

Mobile App Development

As a leading mobile application development company, Techliance has extensive experience in creating high performing, digitally transformative and feature-packed native mobile applications for all the major mobile platforms including iOS, Android, Blackberry OS, and Windows mobile. Additionally, as experts at html5 development, Techliance can also build cross-platform mobile applications that will work on any device or platform.

Music Adjudicator

A simple app that allows Music Adjudicators to leave verbal comments while judging music groups attending festivals with competing groups. Music Directors have secure access to listen to comments specifically about their group. They can be reviewed on their phone or the website, musicadjudicator.com, by entering their unique username.

ú 🕨

Group Travel Videos

This app is designed to allow you to upload and share group travel video photos with family and friends back home as you travel. We'll use your photos to create a very cool video for your group. You will be able to watch a highlight video and the full-length video right on your mobile device, tablet, or computer. Also, you will be able to view everyone's photos and share them on Facebook, as well as your highlight video. And all with this app!

OurCalling

Imagine you meet a homeless man at the street corner in Dallas who tells you he hasn't eaten in three days. He needs more help than you can provide. The OurCalling app gives you access to information on hundreds of service providers for the homeless and impoverished throughout Dallas county in texas. This app also serves as a digital version of the helpimhomeless.com directory.

Guilder

This app makes ordering maintenance services for your home as simple and straightforward as buying a product online. Answer a few questions and we'll give our best guess on the required repair and estimate the cost of repair. Additionally, we'll list likely additional services that may be required to perform a proper repair, so you have no surprises. From the app, you'll know when the technician will arrive, who they are, and how customers have rated their work in the past.

Ambereat

Ambereat is a platform for foodies to find the best restaurants, cafes, and takeaway nearby. Foodies can order food and the restaurant will use the platform to deliver the food to the customer. With menu, schedule, order, and delivery management features, this chains to manage their operations across the whole franchise or a particular region from a unified interface. Foodies can find and order food on mobile as well as the web platform. Techliance developed this application using OpenCart framework as per customer requirements.

Web Application Development Services

A website is the first impression of your business. We rejoice your customer with our "customer centric" web design services.

Boss LulaRoe Retail Clothing Brand

LulaRoe is a big retail clothing brand which is growing leaps and bounds. They needed a solution to manage their product catalog with 250 new skus added every day, purchase orders, inventory, and demand forecasting. Techliance built this responsive backend system with integrations to 3rd party applications using Laravel 5.2 and Vue.js on LAMP Stack.

Modius360

Modius app is focused on providing the tools that enable companies to gather data about their processes, turn that data into information, and use that information to make effective decisions to guide their company down the path that they desire. Want to know how much a job cost to run? Done. Want to know how much to charge for a new job? Done. Modius360 makes it easy to answer these questions.

400+ Software Projects Delivered

We've been using Techliance since July 2012 to develop the native apps we use in our business. Our team has been very pleased with them from day one. We serve the travel and event business with our photo sharing apps for iOS and Android devices which they created from scratch. They provide excellent and timely work and if there are any issues or any changes that we require they are quick to respond. We use them for all the right reasons for integrity, professionalism, quality, and value. The icing on the cake, they are very nice people to do business with. I would highly recommend Techliance to anyone looking for an app development partner. During the planning and development of the consult connect platform, I was very impressed with the service level provided by Techliance. I am not only pleased with the results of the work performed by the team but I have established good working relationships with each member supporting this product development.

DAVE MARTINSON President Group Travel Videos

Our "Happy Customers" Say It All!

We used Techliance to custom develop an instructor community and e-commerce store using open source platforms as a starting base. We contracted a full time developer that became our "IT employee" for our company. Being a small company we could not afford a full-time developer on staff. Our developer was excellent! He worked well, followed instructions, accomplished milestones and objectives on time with an exceptional quality of work. Working with Techliance went smoothly and they were able to understand requirements clearly and helped me complete my project on-time. They delivered quality software and paid close attention to the details. The developers were professional and easy to communicate with. I highly recommend working with Techliance. Working with Techliance and the skilled consultant is always a pleasure. For us it means that we have access to a flexible resource pool, enabling us to take on larger assignments and assignments that we would otherwise have to turn down.
