

A person in a light-colored shirt is seen from the side, sitting at a desk in an office. They are looking at a computer monitor that displays a Google search results page. The desk is cluttered with various items, including a keyboard, a mouse, a glass, and some papers. The background shows other office desks and windows, slightly out of focus. A large, white, bold text overlay is centered on the image, reading "Virus Solution Provider" and "Data Recovery Services".

LOST PARTITION RECOVERY

It is very normal to encounter data loss while formatting a system. The most common problem faced during formatting a system is loss of a logical drive/partition. It might also occur due to physical memory dump. In such cases we restore the lost or corrupt partitions retrieve the lost data. Our program scans the whole system and collects the lost data. The recovered data is then fed into fresh logical partitions in an organized manner.
